Profile

Karni Packaging Private Limited

Established in the year 2006, we, "Karni Packaging Private Limited" are a reputed organization involved in the business of manufacturing, exporting and supplying Food packaging Material and Sealed Pouches. Our professionals have specifically manufactured these products from quality tested raw material procured from the certified vendors of the industry. Further, latest technology is applied to match the prevailing trends of the industry and incorporating the required features. Our products are widely demanded in varied food processing industries, agriculture sectors and other allied sectors.

Mission :

Our mission is to embrace our core principles, which put the development and empowerment of our team members at the forefront. As a result, our team will develop enduring, valuable relationships with both clients and vendors.

Vision :

Our vision is to deliver package excellence, which is defined by excellent quality, unmatched service, continuous improvement, and ongoing innovation. We want to be one of the top flexible packaging companies in the market.

Values :

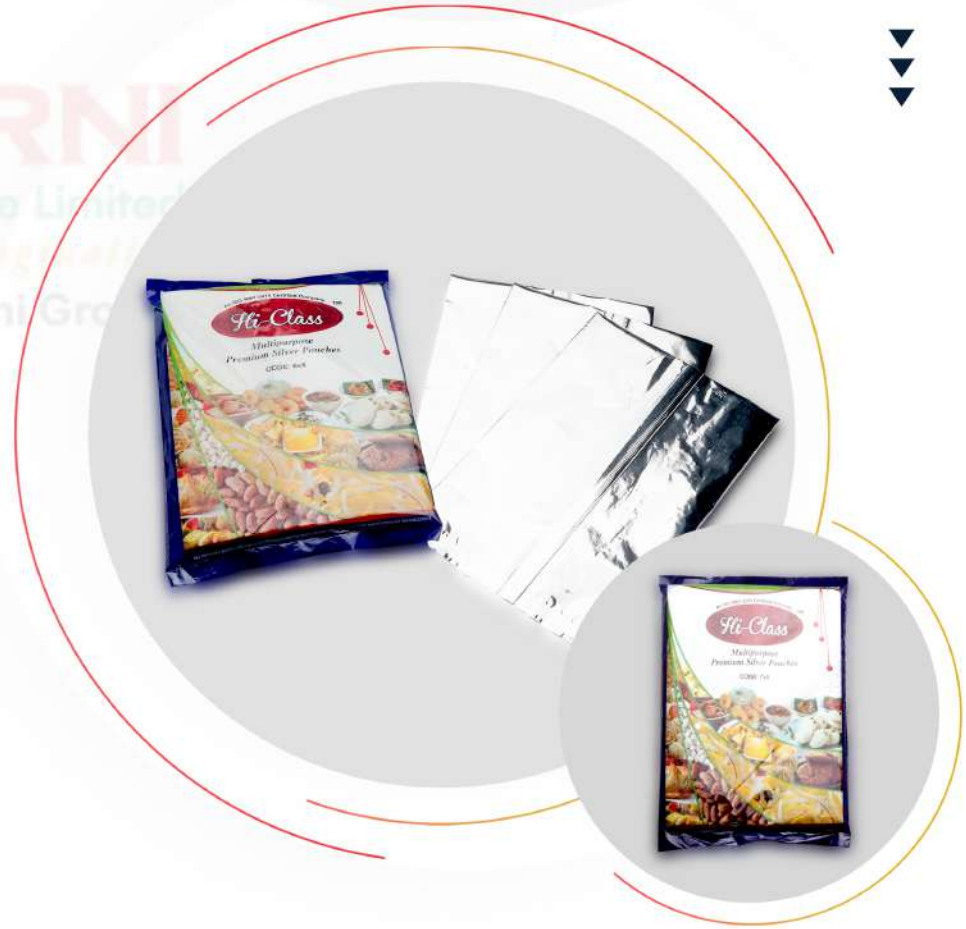

- Display a commitment to the cause, the vision, and the goal.
- Be sincere, dependable, and show integrity in whatever you do.
- Accept responsibility for your words, actions, and inaction.
- Possess the discipline to maintain your attention on things that will enhance your relationships and your career.
- Engagement with a high level of commitment in everything you do.
- Sacrifice readiness and a "whatever it takes" mentality
- Accepting teamwork as the best strategy for achieving more jointly
- Since life's hardships and tragedies have taught us all that we must make the most of the time we are given, living and working with a sense of urgency
- Let your actions speak for you & practice listening more and speaking less.
- Encourage innovation and creativity because we must constantly consider fresh approaches to issues and possibilities.

- Installed Capacity of over 300 MT per month
- Thickness from 18to 250 Micrans
- Auto gauge controller for thickness control

Quality

For Karni Packaging Quality Control is essential for ensuring that the right packaging of the products is provided through our packaging solutions that can in turn help businesses achieve their objectives.

Karni Packaging performs first product inspections and uses lot traceability at the completed product level. At each stage of the manufacturing process, our quality inspectors perform an initial inspection and then an in-process test. Quality retains are gathered and kept for the duration that the customer specifies.

A dedicated QC space is available at every step of our manufacturing process to provide input, online, and output testing. This aids in reducing flows so that we can uphold the standards expected by our customers through our Total Management System.

The food industry faces a number of fundamental issues with the changes in consumers' tastes and preferences from delivering consumers more sustainable products to continuously improving processing and packaging.

R & D

We at Karni Packaging truly believe that Research & Development is the only path to success, and we intend to pave the road ahead. Our team consists of in-house quality personnel with a vast experience over two decades in the field of flexible packaging.

They work closely with our clients for improving existing packaging material and also provide innovative solutions that will enhance their product value.

Cylinder Engraving

- . In house cylinder engraving facility
- . 15000 units per annum
- . The capacity will be increased to 25000 units by 2022

Vision:

Our vision is to deliver package excellence, which is defined by excellent quality, unmatched service, continuous improvement, and ongoing innovation. We want to be one of the top flexible packaging companies in the market.
